### AWARDS

### PRODUCT

Name	SIX L 2 DIM DALI 34° 2700K WT
Reference	A2862420WT
Color	Textured white
RAL	9016
Category	TRACK LIGHTS

### LIGHT SOURCE

Type	LED
Gross luminous flux	2850 lm
Colour temperature	2700 K
Chromatic stability	MacAdam Step 2
Colour Rendering Index	CRI > 90
Power	24,5 W
Current	700 mA
Efficacy	116 lm/W
LED lifespan	L90B10 > 55.000h

### LIGHTING FIXTURE | PHOTOMETRIC DATA

Lighting efficiency	90%
Light beam angle	34°

### LIGHTING FIXTURE | ELECTRICAL DATA

Driver	Included
Power values of the system	28,15 W
Frequency	50/60 Hz
Dimming	DALI
Electrical insulation class	□

### OTHER DATA

Sealing	IP20
Wireless control	Please Consult
Swivel angle	310°
Rotation angle	350°
Track type	Track 3L+N Dimmable
Weight	660 g
Packaged weight	785 g
Packaging dimensions	309 x 195 x 62 mm
Units per package	1
Materials	Aluminium / Polycarbonate

Six is a spotlight for either track or single recessed installation, standing out by its optical lightness and elegance. Its body comes in shape of a disk with a slightly convex rim that encloses an innovative combination of reflector and lens. The joint action of both achieves to direct the light beam with maximum uniformity in a minimum distance, which at the same time allowed the differentiated design of Six, compact and minimalist. The Six spotlight range is available from the XS to the XL size, with versions suitable for low and high voltage tracks, recessed versions, and "double" versions, composed of 2 contiguous elements.

For some of its products, Arkoslight offers the possibility to provide them with a special LED, designed to create an illumination focused on visually promoting goods or products for commercial purposes. It is a high chromaticity LED, capable of identifying the colour shades that produce a positive psychological perception of the illuminated object.

This special LED lighting source offers a much more attractive and intense colour range than a conventional LED, besides being much wider. Technically, this is possible thanks to a special LED setting that includes a «special saturation parameter», capable of highlighting the objects colours and materials in such a way that they seem more attractive within the visible light spectrum. To achieve this performance, in each case, the appropriate diode and specific phosphor coating are carefully selected.
