Six 48V ist eine Strahlerfamilie für Niedervoltschienen, die sich durch ihre Leichtigkeit und Eleganz auszeichnet. Erhältlich in den Größen L, M, S, XS und XS Double. Sein Körper hat eine Scheibenform und ist leicht abgerundet, was eine innovative Kombination aus Reflektor und Linse einschließt. Die gemeinsame Aktion beider schafft es, die Lichtstrahlen mit der maximalen Gleichmäßigkeit in einem minimalen Abstand zu lenken, der ihr differenziertes Design - reduziert und minimalistisch - ermöglicht. Darüber hinaus bietet der Gelenkarm eine große Bewegungsfreiheit, um den Strahler in alle Richtungen zu führen.

High Chromatic LED

Für die Produktpräsentation.

Einige der Produkte von Arkoslight können mit einer Spezial-LED für die visuelle Bewerbung von Waren und Produkten zur Verkaufsförderung ausgerüstet werden.

Dabei handelt es sich um eine hochchromatische LED, um Farbtöne hervorzuheben, die positive psychologische Wahrnehmung des beleuchteten Objekts begünstigen.

Diese spezielle LED-Lichtquelle bietet eine ansprechendere und intensivere Farbpalette als eine herkömmliche LED. Dies wird durch die Konfiguration der LED nach einem "speziellen Sättigungsparameter" erreicht, der Farben und Textur der Objekte innerhalb des sichtbaren Spektralbereichs attraktiver erscheinen lässt.

Dafür wird die jeweils zweckdienliche Diode und spezifische Phosphorbeschichtung gewählt.

Track 48V

ARKOSLIGHT

48V track lighting systems are low-voltage lighting solutions based on electrified tracks. The track serves both as a physical structure and as a power carrier, allowing light modules to be placed and repositioned as needed, offering flexibility, safety, and energy efficiency. Ideal for projects that demand minimalist design, high performance, and adaptability.

To configure your 48V system, you'll need to combine the following components:

1. Tracks – Available in surface, trimless, surface short, suspended (using suspension accessories with the surface track), and indirect light versions. They form the structural and electrical base of the system.
2. Connectors & Power Supply – Ensure electrical continuity between track sections and provide the 48V power input.
3. Accessories – Including end caps, joiners, mounting elements, and optional installation accessories to complete and secure the setup.
