Six 48V es una familia de proyectores para aplicaciones de carril de bajo voltaje que destaca por su ligereza y elegancia. Disponible en tallas L, M, S, XS y XS Double, su cuerpo se plasma en forma de disco, ligeramente redondeado, que encierra una innovadora combinación de reflector y lente. La acción conjunta de ambos consigue direccionar los rayos de luz con la máxima uniformidad en una distancia mínima que, a su vez, ha permitido su diferenciado diseño -reducido y minimalista-. Además, su brazo articulado le otorga gran movilidad para orientar la pieza en todas direcciones.

Arkosligh ofrece en algunos de sus productos la posibilidad de dotarlos de un LED especial para iluminación orientada a la promoción visual de bienes y productos con finalidad comercial.

Se trata de un LED de alta cromaticidad que persigue destacar los tonos que favorecen la percepción psicológica positiva del objeto iluminado.

Esta fuente de luz LED especial ofrece una paleta de colores más atractiva e intensa, por encima de lo que lo hace un LED convencional. Esto se consigue gracias a la configuración del LED bajo un "parámetro especial de saturación" que consigue que los colores y la textura de los objetos se muestren más atractivos dentro del espectro de luz visible. Para ello se selecciona, en cada caso, el diodo pertinente y su fósforo de recubrimiento específico.
