Schermo a nido d’ape antiabbagliamento

Accessorio composto da uno schermo a nido d’ape che controlla il fascio luminoso, riduce l’abbagliamento e protegge dalla visione diretta della sorgente luminosa.

|                             |                      |

Schermo antiabbagliamento

Accessorio progettato per ridurre l'abbagliamento diretto, soprattutto nelle apparecchiature con ottiche visibili, e migliorare il comfort visivo bloccando angoli di emissione fastidiosi.

Filtro lineare

Trasforma il fascio di luce circolare in una forma lineare. Ideale per applicazioni che richiedono una distribuzione precisa e lineare della luce, permettendo di focalizzare su superfici specifiche o evitare le proiezioni di luce puntuale in ampi spazi.

## High Chromatic LED

### Per presentazione commerciale del prodotto.

Arkoslight offre su alcuni dei suoi prodotti la possibilità di dotarli di un LED speciale per illuminazione orientata alla promozione visiva di beni e prodotti a scopo commerciale.

Si tratta di un LED ad alta cromaticità che mette in rilievo le tonalità che favoriscono la percezione psicologica positiva dell'oggetto illuminato.

Questa sorgente di luce LED speciale offre una gamma di colori più attraenti e intensi, superiore a quella che può offrire un LED convenzionale. Ciò si ottiene grazie alla configurazione del LED secondo un "parametro speciale di saturazione" che fa in modo che i colori e la texture degli oggetti appaiano più attraenti all'interno dello spettro di luce visibile. A tale scopo si seleziona, in ciascun caso, l'apposito diodo e il suo fosforo di rivestimento specifico.

# Track 48V Surface Short

ARKOSLIGHT

48V track lighting systems are low-voltage lighting solutions based on electrified tracks. The track serves both as a physical structure and as a power carrier, allowing light modules to be placed and repositioned as needed, offering flexibility, safety, and energy efficiency. Ideal for projects that demand minimalist design, high performance, and adaptability. To configure your 48V system, you'll need to combine the following components:

- 1. Tracks – Available in surface, trimless, surface short, suspended (using suspension accessories with the surface track), and indirect light versions. They form the structural and electrical base of the system.
- 2. Connectors & Power Supply – Ensure electrical continuity between track sections and provide the 48V power input.
- 3. Accessories – Including end caps, joiners, mounting elements, and optional installation accessories to complete and secure the setup.

## Track Options

Choose the track version required for your project configuration.
