As an exercise in monolithic forms, Cyclop joins the Arkoslight collection as a bedside reading wall light designed for headboards, bringing a minimalist and contemporary aesthetic. Inspired by the movement of the human eye, its 360° rotatable sphere directs a warm, focused light. Both the light source and the reflector are recessed within the outer plane of the sphere, effectively eliminating glare to create a functional, relaxing atmosphere for residential and hospitality spaces. Available in textured white and black finishes, it features an integrated on/off button seamlessly located on the front of the fixture to maintain its clean, refined silhouette. Designed by Mario Ruiz.
